

Application sheet

Premium fountain solution for coldset printing, with built-in AquaPure™ Technology

Key benefits

- excellent print and colour stability, also for high-speed presses
- fast start-up for minimum paper waste
- built-in AquaPure technology, prevents biogrowth and is entirely biodegradable and harmless to the user
- suitable for all types of dampening systems
- drastic reduction of need for dampening water replacement and fount circuit maintenance
- does not contain harmful biocides

Properties

- corrosion inhibited, matching OEM directives
- strong buffer for optimized pH level

colour	blue
PH value (working strength)	4,8 – 5,2
dosage	2-3%
IPA-dosage	0%
packaging - kg	10 – 25 – 225 – 1000

Application advice for best performance

- assure correct dosage of the advised concentration
- for use with RO water, stabilise the water first with BluePrint Rehardener™
- for cleaning the dampening circuit, use BluePrint System Cleaner™ regularly
- replace fountain solution filters weekly

Consult the MSDS for information on handling, storage and personal protection. The info above is based on the data presently available, no binding assurance is granted regarding suitability for specific applications and conditions. BluePrint Products NV reserves the right to alter product properties when required for technical, environmental or manufacturing purposes. Storage: 5-40°C. Shelflife: minimum 12 months. Protect from direct sunlight.
