

BluePrint Washes and Founts ISEGA certified !

- We are proud to announce that an extensive range of our products are granted a certificate of compliance by the ISEGA organisation, highly appreciated in the food packaging industry.
- These independent 3th party certificates support the printer towards a worry-free production process, stating that these products have successfully passed tests as prescribed by EC ordinances, the LFGB and others. More details are listed in the following slides.
- The use of these certified products leads to a safer, more secure production environment and to a finished product, compliant with the highest food packaging safety standards.
